PRODUCT DATA SHEET

OPEROSTUDIO

Self-Service Data Analytics directly from JD Edwards EnterpriseOne

OperoStudio is the integrated analytics platform with Data Modeller and Extractor for controllers, power users, and analysts. Create analyses from JDE – without SQL, without an IT ticket. The native JDE AIS integration guarantees data security: your data never leaves your infrastructure.

- ✓ Visual table join builder – no SQL required
- ✓ Native JDE AIS REST integration
- ✓ Excel and CSV export with cron schedule
- ✓ Available in cloud and on-premise

Data services
automatable

Data Modeller and Extractor on One Platform

Six core functions. From the table browser to automated email delivery.

TABLE BROWSER

15,062 JDE objects

Full JDE metadata:
all tables and views
searchable with CHAR/NUM/
DATE/DEC info and alias.

VISUAL JOINS

Drag-and-drop editor

Connect tables via drag
and drop. Inner/outer joins
over business views or
custom conditions.

FIELD SELECTOR

Clear selection

Clean field selection with
data type info and alias.
Filterable, groupable,
aggregatable.

LIVE PREVIEW

5 rows before export

Before exporting, see the
first 5 rows of the result –
without pulling the full
data set.

EXCEL + CSV

One-click export

One-click export to Excel
or CSV. Configurable as a
schedule for recurring
reports.

SCHEDULED EXTRACTS

PREMIUM

Cron + email delivery

Cron-based schedules:
daily at 6:00, weekly on Monday,
monthly on the 1st –
automatic email delivery.

Secure AIS Architecture

Data access exclusively via the native JDE AIS REST API. Your data never leaves your infrastructure – full GDPR compliance and audit trail.

How Customers Use OperoStudio

Real scenarios. Real impact.

Sales Controller

Weekly revenue report – fully automated.

PROBLEM

Sales leadership needs the revenue report from the previous week every Monday – currently a manual Excel export from JDE, taking 30 minutes per week.

SOLUTION

The controller builds the report once in OperoStudio (F4211 joined with F0101), saves it as an extract with the schedule "every Monday 6:00", and sales leadership automatically receives the Excel file by email.

RESULT

Manual work is eliminated. The report is on time, always current, and always in the same format – without anyone having to remember.

Auditor Request

Special analysis in minutes – without an IT ticket.

PROBLEM

The auditor asks for an overview of all open receivables with customer addresses for 2025. IT would need a week of lead time.

SOLUTION

The controller builds the analysis in OperoStudio himself in 10 minutes: F03B11 (receivables) joined with F0101 (addresses), filtered to open items in 2025, exported as Excel – straight to the auditor.

RESULT

No IT ticket, no waiting, no consultant costs. The auditor receives his analysis on the same day.

Industry Analyst

Custom KPI for manufacturing – without a BI project.

PROBLEM

You need an industry-specific KPI that standard JDE reports don't provide: inventory turnover by location and product group.

SOLUTION

OperoStudio provides direct access to all relevant JDE tables (F41021, F4101, F4102). The analysis is defined visually, tested with live preview, and distributed automatically.

RESULT

Data-driven decisions without an expensive BI project. New KPIs are ready in hours instead of weeks.

Choose the Right Edition

Cloud subscription or on-premise perpetual licence. All prices net, excluding VAT.

Starter

For small analytics teams getting started.

€ 290

per month

plus €1,500 setup

- ✓ Up to 3 power users
- ✓ 1 JDE environment
- ✓ 10 data services
- ✓ Excel + CSV export
- ✓ Standard support

Business

For controller teams with recurring reports.

€ 590

per month

plus €2,500 setup

- ✓ Up to 10 power users
- ✓ 2 JDE environments
- ✓ 50 data services
- ✓ Cron-scheduled extracts
- ✓ Business support

Professional

For departments with automated analyses.

€ 990

per month

plus €3,999 setup

- ✓ Up to 25 power users
- ✓ All JDE environments
- ✓ Unlimited data services
- ✓ API access
- ✓ Priority support

Enterprise

For enterprises with dedicated requirements.

€ 1,590

per month

plus €5,999 setup

- ✓ Unlimited users
- ✓ Dedicated instance
- ✓ Custom data services
- ✓ SLA + premium support
- ✓ Consulting included

MOST POPULAR

On-premise

Starter € 9,900 · Business € 19,900 · Enterprise € 34,900 perpetual licence plus 20 % annual maintenance

Suppora Care – We're here for you.

For Suppora Care customers, OperoStudio is included in the package – with no additional licence costs. Care packages from € 2,500 per month, including 12–80 engineer hours.
